

IVÁN AGUSTÍN ZARATE

Software Analyst & Project Manager | Software, Data & AI Solutions | Java, Spring Boot, React, Oracle

Monserrat, Autonomous City of Buenos Aires, Argentina | ivan.agustin.95@gmail.com | +54 11 4097 3159 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL PROFILE

Software Analyst with experience developing and implementing platforms, managing sensitive data, and coordinating projects in institutional environments. I gather user needs, translate them into technical solutions, and support integration and production rollout. My career target is a Forward Deployed Engineer role, building on this hands-on, user-facing delivery experience.

Experience applying MLOps concepts and AI model lifecycle practices within platforms, with a focus on data quality, privacy, traceability, deployment, and continuous improvement.

PROFESSIONAL EXPERIENCE

Software Analyst / Digital Platforms Project Manager | National Directorate for Security Database Management, Ministry of National Security | 2024 - Present | Argentina

- Development and implementation of institutional platforms, from user discovery and functional definition through production rollout.
 - Integration of AI capabilities into platforms and participation in the model lifecycle: data preparation and validation, experimentation, deployment, monitoring, and iterative improvement.
 - Application of MLOps practices to organize model versions, traceability, evaluation, and operation, including neural networks and text and image models.
 - Work with critical databases, safeguarding privacy, access control, traceability, and data quality at every stage.
 - Coordination with user areas, vendors, technical teams, and cybersecurity specialists; training on data, responsible AI, and information security.
- Data, Control, and Information Management Analyst | Argentine Federal Police - Public Databases Office | 2018 - 2024 | Buenos Aires
- Technical responsibilities involving public databases, privacy, information protection, control, and responsible use of systems.
- Team Coordinator | Argentine Federal Police - Operations Area | 2016 - 2018 | Buenos Aires
- Team coordination, task planning, communication under pressure, and decision-making.
- Human Resources and Personnel Administration Assistant | COTO Digital - Branch 184 | 2013 - 2015 | Buenos Aires
- Support for payroll settlements, attendance, and personnel updates; confidential and organized management of internal documentation.

SELECTED PROJECTS

CUFRE - Case Management and Prioritization Platform | Ministry of National Security | 2024 - Present

CRUD platform built with Java, Spring Boot, React, Maven, and Oracle to prioritize and track critical records, with a focus on traceability and cross-team coordination.

SIFEBU - Federal Missing Persons Search System | Ministry of National Security | 2024 - Present

Development of a federal system with JavaScript, TypeScript, React, and Oracle, focused on information availability, protection, and quality.

CRIACO - Territorial Analysis and GIS Platform | Ministry of National Security | 2024 - Present

Development of a territorial analysis platform with GIS components, maps, information layers, and data visualization.

OSINTARGY | Private project | 2024 - Present

Platform and training space covering OSINT tools, digital investigation, data handling, and privacy best practices for small businesses.

EDUCATION

Systems Analyst | ORT Argentina Higher Institute | 2024 - 2026

Degree awarded.

Bachelor's Degree in Security, focus on Criminal Investigation | University Institute of the Argentine Federal Police | 2020 - 2025

Training in investigation, information analysis, work methodologies, and the study of complex security-related phenomena.

Google Data Analytics Professional Certificate | Google / Coursera | 2024

Eight-course certificate covering data preparation, cleaning, analysis, and communication using SQL, Tableau, R, and spreadsheets.

CORE SKILLS

Forward Deployed Engineering target: user discovery, requirements gathering, functional-to-technical translation, integration, documentation, training, and production rollout.

AI and MLOps: model lifecycle, data preparation and validation, experimentation, versioning, deployment, monitoring, and continuous improvement; neural networks, Hugging Face, QLoRA, and text and image models.

Software development: Java, Spring Boot, React, JavaScript, TypeScript, Maven, APIs, Git, Oracle, SQL, and production CRUD platforms.

Data, privacy, and security: data quality, sensitive information, privacy, traceability, access control, auditing, OSINT, GIS analysis, and applied cybersecurity.

AI tools: local open-weight models, coding agents, Claude, Codex, and OpenCode, with a focus on privacy and minimizing shared data.

LANGUAGES

Spanish: Native.

English: Intermediate. Strong technical reading comprehension; experience in meetings and vendor interviews to coordinate technology acquisitions.

Personal details: Date of birth: August 17, 1995; current residence: Monserrat, Autonomous City of Buenos Aires.
