IVÁN AGUSTÍN ZARATE

AI Solution Architect | Applied AI, Agent Evaluation & Data Privacy | Java, Spring Boot, React, Oracle

Monserrat, Autonomous City of Buenos Aires, Argentina | ivan.agustin.95@gmail.com | +54 11 4097 3159 | LinkedIn | GitHub

PROFESSIONAL PROFILE

AI Solution Architect at ACSYS with ten years in public security, where I built institutional platforms on critical databases and worked on data protection and digital investigations. I take AI systems from user discovery to production, with a focus on evaluation, human oversight, privacy, and traceability. My next step is full-time empirical AI safety research: agent evaluation, scalable oversight, and privacy safeguards.

PROFESSIONAL EXPERIENCE

AI Solution Architect | ACSYS - Business Engineering & Innovation | 2026 - Present | Argentina

- Discovery, enterprise AI architecture, RAG, identity, security, and proofs of concept, supporting presales and delivery.
- Translation of business needs into requirements, scope, architecture, decisions, and acceptance criteria, connecting presales, specialists, and delivery teams.

Software Analyst / Digital Platforms Project Manager | National Directorate for Security Database Management, Ministry of National Security | 2024 - 2026 | Argentina

- Development and implementation of institutional platforms, from user discovery and functional definition through production rollout.
- Integration of AI capabilities and MLOps across the model lifecycle: data preparation and validation, experimentation, versioning, evaluation, deployment, and monitoring of neural networks and text and image models.
- Work with critical databases, safeguarding privacy, access control, traceability, and data quality at every stage.
- Coordination with user areas, vendors, technical teams, and cybersecurity specialists; training on data, responsible AI, and information security.

Data, Control, and Information Management Analyst | Argentine Federal Police - Public Databases Office | 2018 - 2024 | Buenos Aires

- Technical responsibilities involving public databases, privacy, information protection, control, and responsible use of systems.

Team Coordinator | Argentine Federal Police - Operations Area | 2016 - 2018 | Buenos Aires

- Team coordination, task planning, communication under pressure, and decision-making.

Human Resources and Personnel Administration Assistant | COTO Digital - Branch 184 | 2013 - 2015 | Buenos Aires

- Support for payroll settlements, attendance, and personnel updates; confidential and organized management of internal documentation.

SELECTED PROJECTS

Atlas Urbano - Tool-using AI agent for zoning analysis | Personal project | 2026 - Present
Live at atlas.iazarate.com. An agent that calls public GIS and zoning APIs and must declare missing data instead of inferring it. A second-model review checks each draft against tool outputs (it corrected 14 of 22 measured complex queries); per-stage telemetry and 129 test suites.

Human-in-the-loop AI tools | Open source | 2026
Auto-Inbox, Redmine Agent, and Araña Web: AI drafting that requires human validation before acting, with auditing. github.com/IAZARA

CUFRE - Case Management and Prioritization Platform | Ministry of National Security | 2024 - 2026
CRUD platform built with Java, Spring Boot, React, Maven, and Oracle to prioritize and track critical records, with a focus on traceability and cross-team coordination.

SIFEBU - Federal Missing Persons Search System | Ministry of National Security | 2024 - 2026
Development of a federal system with JavaScript, TypeScript, React, and Oracle, focused on information availability, protection, and quality.

CRIACO - Territorial Analysis and GIS Platform | Ministry of National Security | 2024 - 2026
Development of a territorial analysis platform with GIS components, maps, information layers, and data visualization.

OSINTARGY | Private project | 2024 - Present
Platform and training space covering OSINT tools, digital investigation, data handling, and privacy best practices for small businesses.

EDUCATION

Systems Analyst | ORT Argentina Higher Institute | 2024 - 2026 | Degree awarded.

Bachelor's Degree in Security, focus on Criminal Investigation | University Institute of the Argentine Federal Police | 2020 - 2025 | Investigation and information analysis.

Google AI and Google Data Analytics Professional Certificates | Google / Coursera | 2024 - 2026 | SQL, Tableau, R, and applied AI.

Anthropic Academy | 2026 | Claude Code 101 and AI Capabilities and Limitations.

CORE SKILLS

AI safety interests: agent evaluation, faithfulness to tool outputs, human and model oversight, privacy harms from web-search agents, and red-teaming.

Solution architecture: user discovery, requirements, functional-to-technical translation, integration, and production rollout.

AI and MLOps: model lifecycle, evaluation, versioning, deployment, and monitoring; Hugging Face, QLoRA, neural networks, and text and image models.

Software development: Java, Spring Boot, React, JavaScript, TypeScript, Maven, APIs, Git, Oracle, SQL, and production CRUD platforms.

Data, privacy, and security: data quality, sensitive information, privacy, traceability, access control, auditing, OSINT, GIS analysis, and applied cybersecurity.

AI tools: local open-weight models, coding agents, Claude, Codex, and OpenCode, with a focus on privacy and minimizing shared data.

LANGUAGES

Spanish: Native.

English: Intermediate. Strong technical reading; working meetings with technology vendors.

Personal details: Date of birth: August 17, 1995; current residence: Monserrat, Autonomous City of Buenos Aires.
